EDGE LINDHAUS VACUUM

Engineered To Last

Easy Operation

Ideal for Healthcare

The EDGE Lindhaus is an essential and highly efficient vacuum capable of solving a variety of cleaning tasks.

The multilevel filtration controls particulate and biological contamination more effectively than other uprights available. Sound and frequency levels are reduced by the use of sound-deadening materials alongside precision motor technology.

Ergonomic engineering provides the highest levels of operator comfort increasing productivity. The Lindhaus CH-Pro is the only vacuum cleaner engineered exclusively for the specific needs of the healthcare facility

Advantages

Approved by Hospitals - 5 Stage Filtration System to Contaminate Intake

User Friendly - Easy to Operate, User Friendly Maintenance

Hard Floor Capabilities - Non-Marking Rubber Tyres

Noise Level - Quiet in Operation
