

## **Carpex 50:500 & 70:500**

### **Industrial carpet / hard floor cleaning machines**

**CARPEX 50:500**

**CARPEX 70:500**

- Ideal for large floor areas
- Adjustable speed
- Water flow regulator
- Height adjustable brush
- Narrow width to improve productivity
- Ideal for narrow aisles & hard to reach areas
- Optional heating unit for hot water carpet cleaning

The Carpex 50:500 and 70:500 have been designed to clean medium to very large carpeted areas. They are practical and easy to use and offer a narrow width for cleaning in confined spaces. These carpet extractors are also very competitively priced for their productivity levels and performance.

The Carpex 50:500 (previously the Elite Silent) is also known as the Edge Carpetline 500SA. The 50:500 is very suitable for daytime cleaning with a noise level of only 60dbA as well as using a brush assisted traction. Converts into a hard floor scrubber, using a quick fit squeegee.

The Carpex 70:500 (previously the Powerful) is also known as the Edge Carpetline 700TA. The 70:500 has traction drive with speed control which saves time when cleaning large areas. It also has a differential driving motor which drastically improves manoeuvrability.

#### **Carpex Hot Water Unit**

The Carpex Hot Water Unit, available separately, converts your carpet cleaning machine into a hot water carpet cleaner, by rapidly heating cold water to 70°C, for deeper, hygienic cleaning of carpets and upholstery, with the removal of more ingrained dirt and stains.

This 1800W hot water unit has a recirculation system, allowing water to flow through the heater and re-enter the solution tank, to reach higher temperatures. It also has a thermal cut out switch to avoid overheating.

The hot water unit can be mounted to the Carpex 50:500 and 70:500 machines and can also be used separately with other types of injection-extraction carpet cleaning machines.

## Technical data: Carpex 50:500 & 70:500

Features:	Carpex 50:500	Carpex 70:500
Recovery Tank Capacity (ltr)	50	70
Solution Tank Capacity (ltr)	50	70
Vacuum Motor	1500w 3 stage	1500w 3 stage
Pump Power (W)	80	80
Pump Pressure (bar)	9	9
Cleaning Width (mm)	500	500
Max, Performance (m2/h)	500	600
No.of Nozzles	5	5
Cable Length (m)	15	15
Weight (Kg)	55	65
