

Edge Lindhaus Vacuum

Upright vacuum cleaner

- Engineered to last
- Easy operation and maintenance
- 5 Stage filtration system
- Ideal for healthcare cleaning
- Ideal for carpets or hard floor vacuuming

The EDGE Lindhaus is an essential and highly efficient upright vacuum cleaner suitable for solving a variety of cleaning tasks in domestic and commercial situations, including hospitals.

The multilevel filtration controls particulate biological contamination more effectively than other available uprights. Sound and frequency levels are reduced by the use of sound-deadening materials alongside precision motor technology and the non-marketing rubber tyres enable use on hard floors. Ergonomic engineering provides the highest level of operator comfort, increasing productivity.

The Lindhaus CH-Pro is the only vacuum cleaner engineered to meet the high demands of the healthcare sector.

Technical data: Edge Lindhaus Vacuum

Features:

CH Pro 14
