

Egholm Park Ranger PR2150

Ride-on park maintenance machine

- For all types of outdoor upkeep and maintenance
- Vacuuming and sweeping machine
- Green attachment for mowing, grass collection and edging
- Snow sweeper, salt & sand spreader
- Compact machine with 4-wheel drive
- Powerful diesel engine, 26hp performance

The Egholm Park Ranger 2150 is a compact utility cleaning machine with a tight turning circle of only 110cm and flexible movement, enabling it to be used in narrow and low-height spaces. Fully hydraulic and easy to operate, there are no mechanical parts such as fan belts, chains and crank shafts and very few wearing parts, so only minimal maintenance is required.

The 26 HP Perkins diesel engine has been designed for energy efficiency and reduced vibration and noise, with the power and traction needed for a wide range of outdoor tasks, year round.

A range of attachments is available for different outdoor tasks, making this a multi-purpose outdoor cleaning machine. Attachments can be quickly changed without the use of tools, so it is easy to change the function of the PR2150 in minutes.

Path and street sweeper

For path and street cleaning, the suction sweeper unit makes the Park Ranger 2150 an ideal choice for sweeping footpaths, pavements, car parks, stairwells etc. The suction unit collects all types of debris and the spiral brush inside the suction mouth draws waste material straight into the hose, to minimise the risk of jamming. Available with 2 brushes, or an optional 3rd brush to sweep around obstacles and under benches etc.

The remote vacuum wander hose makes it possible to clean basements and stairs. a high-tip hopper and rotation cast water tank. Two spray jets fitted to the front brushes dampen the sweeping area to control dust and the filter system ensures that even the smallest dust particles are trapped inside the tank.

Park maintenance and ground care

Attachments for parks and green areas include rotary mowers (1000 or 1200) which are quick, sturdy and efficient when cutting and re-cutting the grass and blowing fine clippings down into the lawn as compost. A mulch kit is also available, and the 1000 mower also offers an optional collection kit. Other accessories include a lawn edger, hedge cutter, weed brush, environmental rake, tipping shovel and leaf suction unit. The PR2150's optional flail mower can cope with any length of grass and also clears moss and weeds. A load carrier and tipper trailer are also available.

Winter maintenance – snow and ice clearance

Attachments include a snow sweeper, snow plough, snow v-plough, snow blower and a salt & sand spreader.

Technical data: Egholm Park Ranger 2150

Features:	PR2150
Engine type	Perkins Diesel 403J-11
Turning circle – inside (mm)	1100
Turning radius kerb to kerb (mm)	3000
Fuel tank (l)	20
Weight (Kg)	670 (560 without cabin)
Payload (Kg)	630 (740 without cabin)
Dimensions (L x W x H) (mm)	2225 x 1015 x 1935 (1210 without cabin)
