

Ehrle KD523 Series 2x2 High Pressure Cleaner

Continuous use cold water pressure washer

- Cold water high pressure cleaner for professional use
- Self-supporting impact resistant device cover
- 2 large wheels and rubber support
- Start-stop system with switch-off delay
- Unloader safety valve with stepless pressure and volume regulation
- Premium option with longer hose & reel

Ehrle Series 2x2 pressure cleaners are extremely portable machines for professional cold water pressure washing, with adjustable flow and pressure.

KD523 2x2-B pressure washers have a robust stainless-steel chassis with impact-resistant cover made of ABS, triplex piston pump with brass pump head, high performance ceramic piston and stainless steel valves.

Easy to use, these machines have a robust rotary on/off switch. Features include a start-stop system that switches the machine to standby after 20 sec and prevents it from cycling, to avoid unnecessary power peaks which can be caused by a constant start-stop every time the high-pressure gun is closed. The machine switches off automatically after 20 minutes and is disconnected from the mains by the electronic Etronic 3 control system.

The unloader safety valve with fully variable pressure and flow, protects the unit from overloading.

Safety features include a user-friendly cable winding system. The 5m rubber connection cable has a cross-section of 1.5 mm², to ensure voltage drop safety and power reduction in stressed operation. A cable clip allows the connection cable to be held securely in position at all times, even during transport. All accessories, guns and lances are held securely in position without rattling by a side impact-resistant lock (click and work). 2 large solid rubber tyres ensure the high-pressure cleaner is easy to handle and stands securely, even on unpaved terrain. A foot platform in the Roto-Mold chassis allows the pressure washer to be easily tilted, making it easy to negotiate curbs and stairs. Detergent supply with ND injector and volume control.

Supplied with 5m connection cable and with locking trays for accessory storage, this is a professional quality pressure washer, designed for long periods of use.

The KD523 includes:

- High pressure 10m hose, 250 bar (premium version has 15m hose and hose reel)
- Trigger gun with swivel
- Spray lance 900mm with adjustable nozzle
- Stainless steel jet nozzle 25°
- Detergent supply with low-pressure injector and metering valve
- Spray-Lance 900mm c/w Rotary-Nozzle (premium only)

Technical data: Ehrle KD523 Series 2x2 High Pressure Cleaner

| Features: | KD523 |
|--------------------------------|-----------------------|
| Operating pressure, adjustable | 30-120 bar / 3-12 MPa |
| Max Flow (ltr/hr) | 300-600 |
| Voltage | 240v |
| Max inlet temperature (°C) | 45 |
| Pump speed (rpm) | 2800 |
| Connected load | 2.4Kw / 12A |
| Dimensions (LxWxH) mm | 600 x 400 x 960 |
| Weight (Kg) Standard / Premium | 37 / 44 |
