

Fogger V240-CF

ULV fogger / sanitising sprayer

- Easy to operate disinfectant sprayer
- Durable and low maintenance
- Suitable for use with antiviral disinfectant
- 5 litre tank capacity
- Also suitable for pest control, indoors / outdoors

The V240-CF Fogger / Disinfectant Sprayer is a popular choice for disinfecting and sanitising, and can be used in conjunction with V2 Antiviral disinfectant for COVID-19 protection.

This professional cold fogging machine can be hand-held (supplied with shoulder strap) and also used stand-alone.

Easy to operate, durable and low maintenance.

This ULV (Ultra Low Volume) fogger is manufactured from highly durable thermoplastic and powered by an electric motor which pressurises the disinfectant solution and disperses it in fine droplets (15 to 30 microns) at a flow rate of up to 150ml per minute, with a fogging distance of up to 6 metres. The flow rate is adjustable with a simple control knob, to suit different areas and conditions.

ULV foggers are suitable for odour control and disinfecting or sanitising, e.g. in care homes, hotels, offices etc. Also ideal for pest control and to deodorise smoke contaminated buildings. The fine fog can penetrate porous surfaces.

Technical data: Fogger V240-CF

Features:	V240-CF
Voltage	230v / 110v
Motor	800w
Tank capacity	5 litre
Droplet size	15-30 um
Fogging distance	6 metres
Spray volume (adjustable)	0-150 ml/min
Nozzle Type	Double turbine
