

Fogger V260-CF

Cold fogger / disinfectant sprayer

- Disinfectant sprayer for professional use
- Easy to operate, durable and low maintenance
- Suitable for use with antiviral disinfectant
- Can be used portable or stand-alone
- Use for fogging indoors and outdoors
- Supplied with extendable hose

The V260-CF Fogger / Disinfectant Sprayer is a professional cold fogger, easy and convenient to use, either as a portable disinfectant fogging machine or as stand-alone.

Easy to operate, durable and low maintenance.

This ULV (Ultra Low Volume) fogger is manufactured from highly durable thermoplastic and powered by an electric motor which pressurises the disinfectant solution and disperses it in fine droplets (15 to 30 microns) at a flow rate of up to 400ml per minute. The flow rate is adjustable with a simple control knob, to suit different areas and conditions.

ULV foggers are suitable for odour control and disinfecting or sanitising, e.g. in care homes, hotels, offices etc. Also ideal for pest control and to deodorise smoke contaminated buildings. The fine fog can penetrate porous surfaces.

Can be used indoors or outdoors and are supplied with a shoulder strap.

The V260-CF includes a 50cm extendable hose, to produce a larger fogging distance and to reach into difficult areas.

Technical data: Fogger V260-CF

Features:	V260-CF
Voltage	230v
Motor	800w
Tank capacity	5 litre
Droplet size	15-30 um
Fogging distance	12 metres
Spray volume (adjustable)	0-400 ml/min
Nozzle Type	Double turbine
Power cord	3 metres
Approx weight (empty)	3.4kg
Dimensions L x W x H (mm)	400x280x280
