

Osprey GumBusters GB1

Battery powered chewing gum removal machine

- Battery powered dry steam cleaner
- Ideal for removing chewing gum
- Invented in the UK
- Tough and robust stainless steel body
- Usable in all weathers!

The Gumbuster GB1 was invented in the UK and is a cost effective powerful chewing gum removal machine.

The GB1 is powered by rechargeable 12 volt batteries, providing up to 5-6 hours of use operation, which recharge fully overnight. It is silent in use, so can be used on busy streets and pavements without causing a disturbance, although there is a warning beacon to let people know that it's working.

With simple controls and a lightweight flexible handle, this machine is easy to operate and the large wheels make it suitable for use on streets and paved surfaces.

How the gumbuster works:

The 10 litre detergent tank is filled with a pre-mixed water/detergent solution, which is heated to become dry steam. The steam dissolves chewing gum on contact, and a little light agitation with the brass brush removes the gum in a matter of seconds!

Technical data: GumBusters GB1

Features:	GB1
Power Supply	2x 115AH, 12V Gel batteries
Detergent capacity (L)	10
Vaporisation chamber capacity (ML)	10
Max steam temperature °C	140
Weight (Kg)	94
Dimensions (L x W x H) (cm)	107 x 58 x 84
