

## **i-mop XXL Scrubber Dryer**

Industrial strength floor scrubber – 62cm

- Highly productive floor cleaning machine
- Operating width 62cm
- Battery powered, 60 minutes run time
- 5 litre solution / recovery tanks
- Unique tilt and swivel system
- Low profile scrub deck, only 7cm
- Fast fill and empty
- Easy to store and carry

The i-mop XXL floor scrubber can clean up to 2300 m<sup>2</sup> per hour, in line with much larger industrial machines, but with the advantage that it can access areas which larger machines can't! With an operating width of 62cm and expanded water capacity, thanks to the 5 litre tanks. The battery pack runs for around 60 minutes and takes the same amount of time to recharge, so with two sets of batteries, the imop XXL can be used constantly.

### **About the i-mop floor scrubber family**

i-mop battery powered scrubber dryers combine flexibility with power and speed. They can turn through 360° on the spot, so can clean in all directions. The very low-profile deck enables cleaning underneath objects, right up to edges, into corners and tight spaces, just as you would with a mop – but much faster.

With twin counter-rotating brushes, i-mops offer excellent cleaning results on internal hard floors, and the advanced suction technology removes most of the cleaning solution, so floors are left almost dry and ready to walk on. A range of brushes and pads is available to achieve best results on different floors and types of dirt.

i-mops are environmentally friendly, with reduced water / chemical consumption and with a quick change i-power battery management system which stops charging when the battery is fully loaded and ensures that the spare battery set is ready for use when needed.

Easy to transport and store, no need for a power outlet and with no trailing cables to worry about, i-mops can be used wherever you need to clean.

## Technical data: i-mop XXL Floor Scrubber Dryer

<b>Features:</b>	<b>i-mop XXL</b>
Working width (cm)	62
Power source	2 x i-power 14 batteries
