

Karcher HDS 1000 DE

Diesel powered pressure washer

- 1050mm spray lance
- Electric starter
- 15m high pressure hose
- Anti twist system (AVS)
- Cage frame
- Lance with triple nozzle (0° / 20° / 40°)

The Karcher HDS 1000 DE, is a powerful hot water high pressure cleaner built in a sturdy tubular frame offering all round protection for components. Ideal for cleaning applications where there is no power supply available.

This pressure washer has a 10 HP Yanmar diesel engine with an electric start function. This unit has an automatic cut out in case of water shortage and an overheat protection, offering maximum performance.

The HDS 1000E will remove the most stubborn of deposits.
