

## MAC PERMAHOT STATIC

### Static hot water pressure washer

- Electrically heated
- 90°C Constant temperature
- 150 bar pressure
- Instant stop system
- Stainless steel construction

The MAC PERMAHOT STATIC is a hot water pressure washer unique to the industry, as it makes it possible to produce a constant 90°C on a standard 415v, 32 amp power supply by utilising the patented 3 x 4kw hollow element heating system.

The MAC Permahot static is ideal for cleaning food environments and other areas, particularly where the diesel fumes caused by a conventional hot water pressure washer may be problematic.

The design of the Permahot means that, unlike other pressure washers, the electrically heated water is delivered at a constant temperature of 90°C with no cooling over time which might be seen in a conventional machine.

The MAC Permahot is constructed on an aluminium frame with robust stainless steel panels and comes equipped with many features including a stainless steel water tank and water softener system and a 15 metre hose with 900mm quick release lance and heavy duty trigger.

# Technical data: MAC Permahot Static

## Features:

## MAC PERMAHOT

Water Flow	6 litres per minute
Pressure	150 bar, 2200psi
Motor Specification	5.5hp, 1450rpm
Shutdown System	Instant Stop
Temperature	0-90°C Constant
Power	415v, 32amps
Weight	100kg
Dimensions (H x W x D)	51 x 96 x 59cm
