

Mini Fogger

Small, low cost fogging machine

- Easy to use hand held fogger
- Ideal for odour and pest control
- Also designed for humidifying and disinfecting
- Rotary valve to adjust output
- Simple to fill and empty
- Corrosion Resistant
- 110v or 240v motor

The Mini Fogger is a low cost fogging machine, ideal for small, localised jobs. It has a wide range of applications, from odour control (e.g. in hotel rooms, cars and care homes) to disinfecting and sanitising and can also act as a humidifier.

Weighing only 1.5Kg (empty), and measuring 25cm high x 11cm wide x 28cm long, with a 1 litre polyethylene tank, this very portable fogger is easy to use in smaller spaces and for spot odour control.

The mini-fogger can be used with any lightweight liquid (oil and water-based fluids) and has an adjustable output of 0-120ml / min with particle size from 15-40 microns. The rotary valve can be used to create anything from a fine light fog to a coarse mist.

Nozzle and housing are made from nylon, tubing is fuel and oil resistant vinyl and their fittings are made of brass.

All in all a robust, easy to use and effective fogging machine.
