

MotorScrubber JET3

Backpack scrubber with spray function

- Multifunctional scrubber for walls, floors and other surfaces
- Battery powered, cordless scrubber
- Compact, lightweight machine with 3.5 hours runtime
- Spray on demand, up to 3 metres
- Pivoting handle for awkward corners
- Suitable for poolside cleaning

The MotorScrubber JET3 battery operated scrubber is designed for use on stairs and for cleaning walls up to 3 metres high. The JET3 is 100% waterproof, so is perfect for poolside use, above and below the waterline.

Lightweight and battery powered by MotorScrubber Backpack Technology, JET3 allows you access to all the hard to reach areas.

With all of the features of the M3 scrubber, the JET3 has an added spray function, so you no longer need to use a separate bucket for your chemical solution. The JET3 includes a 1 litre solution bottle, removing the need for a separate bucket and providing spray on demand, up to a 3 metre distance.

The low water, easy dose chemical injection system can be used with super concentrate chemicals for minimal waste. The solution is delivered though the high pressure pump directly to the scrubbing head for targeted application.

Weighing under 2kg (4.5kg with the battery harness) the JET3 has a telescopic handle, is fully adjustable for user comfort and has a 3.5 hour run time, with quick change brushes to adjust for different surface types. The sealed maintenance free battery has over a 1000 charge life cycle and an 8 hour charge time, so the battery can be charged overnight.

With forged alloy gears and high impact glass filled nylon casing the JET3 is robust and built for trouble free use. The pivoting handle enables cleaning into awkward corners and under objects as low as 20cm.

The JET3 scrubber starter kit includes a selection of pads and brushes, with a choice of handle lengths:

Additional pads and brushes are also available, including a stair brush, see images above.

MotorScrubber Suction Kit – optional extra

The Suction Kit enables you to dry as you scrub. Simply connect to the JET3, then attach to any wet vacuum cleaner, using the universal hose adapter.

Includes a suction housing, universal hose adapter, 5m hose, quick fit squeegees and 2 hose clamps.

All MotorScrubber machines are designed and built in the UK.

Technical data: MotorScrubber JET3

Features:	MotorScrubber JET3
Scrubbing width	18cm
Brush speed	360 rpm
Brush pressure at 5kg	19.7g/cm ²
