

Prochem Fivestar

High performance carpet and floor cleaning machine

- Extraction cleaning machine for carpets and floors
- Optional upholstery cleaning tool
- Compact and portable
- Adjustable handle which folds down for storage
- Power driven self-adjusting brush for all types of carpet
- Patented lift-off bucket for easy filling / emptying

The Prochem Fivestar upright extraction cleaner achieves professional cleaning results on carpets and all types of hard floor, thanks to the self-adjusting, self-levelling brush and all-floor solution control valve.

The self-contained design, combines a powerful pump and vacuum system with a power driven self-adjusting brush, so there are no hoses or wands to attach. The upright mounted motor and cooling system enable this machine to be used for long periods.

To add cleaning solutions, simply lift off the bucket, fill it, set it back on the machine and close the lid. There's no need to pour solutions into the machine, making it safe and easy for operators. The see-through recovery dome enables the operator to see when the machine needs emptying.

An optional hand tool enables cleaning of carpet edges, stairs and upholstery.
