

Snow Foam Lance

easyfoamer ST-73.2

ST73.2
Snow Foam Lance

- Foam injector lance
- Non-corrosive injector unit
- Chemical resistant
- 2 litre bottle
- Vertical or horizontal spray
- Max 300 bar / 80° C

The easyfoamer snow foam lance mixes air and cleaning fluid to create the perfect foam – ideal for high flow applications, up to 300 bar and 80°C. The ST-73.2 has a 2 litre bottle, where the fill level is marked in 200ml steps.

This foam injector lance has a regulator, and a mesh strainer in place of the more typical foam pad, to reduce the likelihood of blockages whilst enabling higher flow rates. The stainless steel non-corrosive injector unit offers the highest level of chemical resistance.

The adjustable nozzle, available in 3 sizes, has a 1/4" female inlet and produces a vertical or horizontal spray pattern, with 5 defined dosing positions.

Optional stainless steel wall bracket, 68mm x 95mm, supplied with fixings.

Efficient and economical commercial floor scrubber dryer

The B 200 R can be used in Eco mode, for reduced power consumption, 40% longer run-time per battery charge and very quiet operation, for use in noise sensitive areas.

ST73.2 Foam Nozzle

Nozzle width	Product code
1.5mm	200073906
1.8mm	200073916
2.1mm	200073956
