

STI QV7

Dry steam cleaner with vacuum

- Double filter system for water and steam
- Sanitising without harsh chemicals
- Continuous refilling steam generator

The STI QV7 Dry Steam Cleaner is an efficient and cost effective sanitising cleaner that offers benefits such as cost, hygiene and environmental factors. Using dry-steam at a temperature in excess of 120 degrees completely sanitises surfaces, killing micro-organisms such as bacteria, mites and mildew.

The maximum operating temperature of 160degrees is well above the requirements needed for effective sanitising. This dry steam cleaner is ideal for surface sanitation, floor cleaning, upholstery cleaning and bathrooms, kitchens and windows.

In addition to the steam facility, the STI QV7 has a vacuum which will immediately suck up all residue grease, grime and bacteria through a water filter which removes the need of vacuum bags that encourage the growth of bacteria. This machine uses dry steam to clean which uses very little water, meaning no harsh chemicals are required, making the machine extremely environmentally friendly.

Technical data: STI QV7

Features:

STI QV7

Power (max) (W)	2500
Voltage (V/Hz)	230/50
Operating pressure (bar/psi)	6
Temperature (°C)	160
Refill tank (l)	1.5
Dimensions L x W x H (mm)	480 x 350 x 320
Empty Weight (kg)	11
