

Long Life Superjet Hose

High pressure hose 3/8" bore

- Working pressure: 208 Bar @ 125°C
- Burst pressure: 828 bar
- Chemical resistant
- Hardwearing carboxylate nitrile cover
- Smooth cover to reduce drag
- More than 30% lighter than our standard hose
- Electroplated or stainless steel 3/8" male ends

High pressure hose, suitable for pressure washing, where the hose transports water under pressure to the cleaning surface. It's important that you use a hose that has a maximum working pressure rating higher than the machine you are using with it, otherwise the machine's pressure capacity will be too powerful for your hose and this will result in damage to the tubing and/or its operator. If unsure, please contact us for advice.

We are delighted to offer this truly long life hose as part of our cleaning equipment range. Many of our customers insist on this type of hose and we are able to offer it at very competitive prices.

Long life superjet high pressure hose is manufactured by one of the largest hose manufacturers in the world. The cover is carboxylated nitrile, the key to longevity in hose. The smooth, dust free, finish reduces drag, making cleaning equipment easier to use. An increase in hose life of up to 5 times is not unusual with this premium grade hose.

Technical data: Karcher IB 7/40 Adv
